Friendship

Friendship isn't just a red ribbon that binds us together.
Or a root that unifies us. It does not derive
from a tree on a wall. This bond
knows no genetics.
Friendship is a
peculiar seed -
no matter what
the season,
the weather,
nor the time
of day. When
planted, it will
always bear
fruit. So as
this friendship
takes its roots and
begins to bloom.
Let's hold hands
to strengthen this
bond and rejoice
to a new
beginning because when
some people come into
our lives and leave footprints on
our hearts and we are never the
same again.

Friendship is a
peculiar bond
and friends are
the ones who
keep it intact
